APPARATUS AND METHOD FOR CONTROLLING BURNER

(57) Abstract:

PURPOSE: An apparatus and a method for controlling a burner are provided to easily confirm that a load normally acts by displaying the action state of the load into a specific character and decimal displaying the sensed temperature of a temperature sensor.

CONSTITUTION: An electronic pump drive device(70) starts pumping the combustion fuel in a fuel tank by driving an electronic pump(71) according to the control of a controller(40). When the combustion fuel is sprayed to a burner(55) through a nozzle, a display(60) displays a specific character. Herein, the specific character displays that a burner motor(51) is acted according to the control of the controller.
